TOTAL \$245.94

as of May 24, 2010

This is a real mini-studio built within a home closet.

TIPS FOR SILENCE

- Keep computer far away from microphone. Use extension cables for monitor and USB2 devices. Mixer, keyboard, and mouse may all route to one USB2 hub. A single USB2 cable from the hub may then go to the computer.
- Use acoustical tiles to dampen reflective sound echoes. Pillows and blankets work too.
- Avoid background sounds such as a dishwasher, fan, kids playing, TV, cars passing by, etc.
